SUMMARY

Cybersecurity-focused Software Developer with hands-on experience in secure cloud-based systems, API security, identity and access control, and DevSecOps practices. Currently pursuing a Master's in Cybersecurity (University of London) with industry certifications including CompTIA Security+ and Microsoft Azure Fundamentals (AZ-900). Professional experience building and securing enterprise-grade applications in regulated environments using Azure, .NET, and modern web frameworks. Strong foundation in networking, operating systems, and software security, with a growing focus on cloud security, risk management, and cybersecurity consulting.

CERTIFICATIONS & EDUCATION

University of London

Master of Science (MSc) in Cybersecurity – In Progress

• **Focus areas:** Security Management & Governance, Network & Infrastructure Security, Software & Application Security, Applied Cryptography, Information Privacy, Cybercrime

Certifications:

- CompTIA Security+
- Microsoft Azure Fundamentals (AZ-900)
- Google Cybersecurity Professional Certificate (Coursera)

Concordia University

Montreal, QC

Bachelor of Computer Science

• Focus areas: In-depth study of Object-Oriented Programming (OOP), Software Architecture and Design Patterns, Data Structures and Algorithms, Computer Networks and Data Communications, Database Management and Design, Cloud Computing, and foundational Cybersecurity principles including secure software design, networking fundamentals, and system security concepts.

WORK EXPERIENCE

SES & Technologies Ltd.

Laval, QC

Full-Stack Web Developer

June 2025 – Present

- Designed and developed secure web applications using Angular and ASP.NET Core, applying secure coding principles, input validation, and role-based access control (RBAC).
- Built RESTful APIs with authentication and authorization controls, ensuring secure data access and protection against common web vulnerabilities.
- Integrated CI/CD pipelines in Azure DevOps with automated testing and code quality checks, aligning with DevSecOps best practices.
- Worked with cloud-based services and databases while considering data protection, access control, and secure configuration in enterprise environments.
- Collaborated in Agile/Kanban teams, contributing to technical documentation and risk-aware design decisions for internal systems.

Genetec Inc.

Montreal, QC

Full-Stack Software Developer Intern

Dec 2023 - May 2024

- Contributed to secure backend services for a cloud-based investigation platform, implementing HTTPS enforcement, authentication mechanisms, and real-time communication using SignalR.
- Worked with sensitive data in a security-critical environment, emphasizing data integrity, controlled access, and performance optimization.
- Strengthened CI/CD pipelines with unit and integration tests, improving system reliability, and reducing regression risks in production environments.
- Assisted in analyzing system behavior and logs to support troubleshooting and incident investigation workflows.

Matrox Graphics Inc.

Dorval, QC

Applications Engineer Intern

May 2023 - Sep 2023

- Developed internal diagnostic tools to identify system misconfigurations and operational issues, improving incident triage and reducing resolution time by over 50%.
- Analyzed logs, system behavior, and customer configurations to identify root causes and recommend remediation strategies.
- Collaborated with engineering and support teams to document findings, escalate defects, and improve system reliability in enterprise deployments.

CYBERSECURITY & CLOUD SKILLS

- **Security Fundamentals:** Threat modeling, risk assessment, secure coding practices, access control, authentication & authorization
- **Cloud Security:** Microsoft Azure fundamentals, cloud identity concepts, shared responsibility model
- **Networking & Systems:** TCP/IP, DNS, HTTP/S, OS fundamentals (Linux & Windows)
- **Application Security:** OWASP Top 10 awareness, API security, secure SDLC
- **DevSecOps:** CI/CD security considerations, automated testing, secure deployments
- **Governance & Risk:** Security policies, privacy principles, compliance awareness (GDPR concepts)
